

Title of the manuscript

N. Author1^{1*}, N. Author2² and N. Author3¹

¹ Common affiliation of (first and third in this example) authors (if and as applicable); first.author@email, third.author@email.

² Distinct affiliation of second author (if and as applicable); second.author@email

*Presenting author

Keywords. Keyword1; Keyword2. Include up to five keywords separated by semi-colons starting with capital letters.

1 General Information

Use this template for typesetting your abstract and follow closely the instructions. The length of the abstract must not exceed **2 pages**. The language is English. Submit the abstract using the web form available in the website before 28th February 2016.

Please follow these general guidelines:

1. Compile to PDFLaTeX
2. Do not alter the style commands.
3. Do not add newcommand, newenviroments, etc.
4. Use your name followed by a colon as first part in all your labels.
5. Use your name as first part of file name for your abstract and all other file like those containing figures. Please use only characters and numbers in file names and in particular avoid spaces.

2 Format of the Text

Please download the file `icors2016.cls` from the internet page of the conference and save it to your working directory. The text of this guidelines is written in the prescribed format and can be used as specimen.

Only the L^AT_EX standard commands should be used. Please give title, author(s), affiliation(s), address(es), 2–5 keywords, text of the abstract and references according to the enclosed L^AT_EX header.

2.1 Section Numbering and Headings

Only the L^AT_EX standard sectioning commands `\section` and `\subsection` should be used. Please do not use a deeper hierarchy.

2.2 Figures, Tables, and Equations

Figures and tables must be included at the appropriate place in the text (by using for example the command `\inclugraphics`). Figures and tables should be numbered and need to have captions. Please use the usual float environments `figure` and `table`.

Equations should be typed using the L^AT_EX commands `\begin{equation} ... \end{equation}` or `\begin{equation*} ... \end{equation*}`.

Labels should be start by your name followed by a colon. References should be included as Lopuhaä & Rousseeuw [1991] or as [Maronna et al. , 2006].
